Professional Summary

Passionate Web Developer with one year of real-world development experience and strong hands-on skills in FullStack development using HTML, CSS, JavaScript, React.js, Node.js, Express.js, Sql/MySQL, MongoDB/Mongoose. Skilled in building responsive, user-centric web interfaces and integrating REST APIs.

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap, Material UI

Backend: Node.js, Express.js

Database: Sql/MySQL, MongoDB/Mongoose

Tools: VS Code, Git, GitHub, Postman

Experience

Trainee Frontend Developer

Jan 2025 – Present

ServiceKaralo.com

Delhi, India

- Working on a “Service Listing Booking” module using HTML, CSS, and JavaScript, where users can view services and submit booking requests.
- Built complex reusable UI components including navbar, service cards, and category sections with mobile-friendly layout.
- Integrated Web3Forms for booking submissions and added basic form validation through JavaScript.
- Supported UI improvements, fixed bugs, and collaborated using Git and GitHub.

Projects

Wanderlust-Travel (*HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Ejs, Bootstrap*)

- Built full CRUD functionality for travel listings.(Create, Read, Update, Delete)
- Designed RESTful APIs using Express.js.
- Used MongoDB with Mongoose for schema design, validation, and data persistence.
- Implemented dynamic server-side rendering using EJS and layout management with ejs-mate.
- Enabled PUT DELETE HTTP methods using method-override.
- Developed responsive UI using Bootstrap with reusable EJS partials.(Navbar, Footer)
- Implemented default image fallback logic in Mongoose schema to handle empty image inputs.
- Structured project with clean separation of routes, models, views, and static assets.

Weather Application (*React.js, Material-UI, OpenWeatherMap API*)

- Built a React-based weather app that fetches live climate data (temperature, humidity, min/max, description) using the OpenWeatherMap API.
- Designed UI using Material-UI Cards, Buttons, and TextField with responsive layout and clean component structure.
- Implemented client-side validation, error handling for invalid cities, and conditional UI with dynamic icons/images.

Personal Portfolio Website (*HTML, JavaScript, Tailwind CSS*)

- Developed a personal portfolio with dark/light mode and smooth navigation.
- Ensured cross-browser compatibility and improved UI responsiveness.
- Deployed on Vercel with ongoing improvements based on user feedback.

Education

B.Tech in Computer Science Engineering

2021 – 2025

Galgotias University, Greater Noida

CGPA: 7.12 / 10

Class XII (CBSE)

2021

Saraswati Vidya Mandir Senior Secondary School, Rambagh, Basti

Percentage: 72%

Certifications

- React JS Assessment — HackerBeen (05 Oct 2025)** — Demonstrated proficiency in React components, Hooks, routing, API integration, and UI logic debugging. *Certificate ID: 12827387130267929161.*
